

## One change to Improve the Educational Experience - Certificate of English as a Second Language

Comment
slightly fewer hours on practicum--slightly more time working on final project
can't think of one
The educational experience of the program was wonderful. As I mentioned, I appreciated the instructors (with the exception of ##### who left each class for extended periods of time while he had us doing group work: students instructing students). Thus, to improve the educational experience of CTESL, I would suggest that there is some sort of monitoring that the instructors are all providing adequate guidance and support to their students.
computers
multimedia learning...maybe videos or something...more oportunities to observe multiple teaching styles (rather than just your practicum teacher)
i would put micro teaching hours/courses , more practical courses teaching how to teach/
<p>Actually, I would like to make more than one!</p> <ol style="list-style-type: none"> <li>1. I think the program should incorporate more on classroom time management in both the methodology and practicum classes.</li> <li>2. For the Intro to Linguistics and Major Structures of English, a short introductory grammar course should be offered optionally or available to students who need it because I know many students faced a lot of difficulty in this area.</li> <li>3. The testing methods for one of the professors, Dr. #####, should definitely be updated as some sections certainly don't measure any knowldege of the material since they only test the ability to memorize. I know I'm not speaking only about myself in this area!!</li> </ol>
CTESL students need to set up an online community, such as cTESL bullition borad, blog as a forum of study help or information sharing.
There is a need for more hours available at the LLRC.
It was truly a great program - I cannot think of a suggestion.
An introduction to grammar course - not the fourth year grammar course which is not applicable.
